REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: allowance of claims 1, 3-12, 14-17, 29-32, and 34-38 is indicated because the Examiner agreed with applicant's remark that having the ferromagnetic layers of opposite magnetization directions does not necessarily exhibit negative exchange coupling between the layer and the prior art of record does not suggest the tunneling magnetoresistive stack exhibits a negative exchange coupling between the ferromagnetic layers where a tunnel barrier layer comprises a titanium alloy oxide is formed at least on the first layer as recited in claim 1 or between the layers as recited in claims 11 and 29 where the tunnel barrier can also be an oxide, nitride or oxynitride of a titanium alloy.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Jongill et al (US 6,759,120), Chen et al (US 6,683,815), Gill (US 6,473,275), and Hiramoto et al (US 2005/0111147).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
